Are you worried about your posture?

So are we.

Poor posture not only leads to back problems, but a multitude of physical and mental health issues.

Posture-related health problems are unavoidable in today's world.

How can we help?

PostureKey is designed to improve posture.

As you lie on PostureKey, it uses your own bodyweight to press against the specifically designed spherical texture. PostureKey then naturally releases tension and realigns your body.

PostureKey allows your body to recover from the daily pressures you place it under.

We can't change the world, but we can change the way you tackle it.

Unlock your body's potential with PostureKey.
